Re: Request of Southern California Edison for Extension of Time to Comply with
Decision (D.) 19-04-020 and D.22-10-002 (regarding SCE's 2022 Risk Spending Accountability
Report)

Dear Ms. Kaushik:

By your letter dated January 6, 2023, Southern California Edison (SCE) requests an extension of time to file its 2022 Risk Spending Accountability Report (RSAR) looking back at last year's spending. SCE requests to extend the current due date from April 30, 2023 to July 28, 2023.

As described in your letter, SCE's regulatory team is busy preparing its Test Year (TY) 2025 General Rate Case application at or about the same time that it would prepare the 2022 RSAR report, and that more time is needed to ensure a high-quality RSAR filing.

D.22-10-002 (Ordering Paragraph 1 and Appendix A to the Decision) specified that the Deputy Executive Director for Energy and Climate Policy may change RSAR schedules in instances such as this, where the utility requested an extension by January 31.

We recognize the need for SCE to have more time to prepare a higher-quality, comprehensive RSAR report. In order to allow sufficient time for the processing of the data necessary to produce both the 2022 RSAR and the TY2025 GRC, I hereby grant SCE's request. The 2022 RSAR report's due dates for SCE, party comments, and ED review, are hereby shifted pursuant to Table 2 of your letter, reproduced below:

Table 2 – Potential SCE 2023 RSAR Review Schedule.

	Original Dates per D.22-10-002	Newly Proposed Dates	Days for Parties to Review SCE's RSAR
SCE Files RSARs	4/30/2023	7/28/2023	
Party Comments	7/21/2023	9/29/2023	63
ED Review	10/31/2023	12/08/2023	70

I expect there to be no material disadvantage to parties and ED as there would still be ample time for stakeholders to review SCE's 2022 RSAR report, and because a rushed RSAR report may be more likely to require errata.

Sincerely,

A handwritten signature in black ink that reads "Leuwam Tesfai". The signature is written in a cursive, slightly slanted style.

Leuwam Tesfai
